Vibe Agent Protocol

A Crypto-Native A2A Trading & Settlement Layer

💗 @YoubetDAO

We already have A2A, ACP, and ANP.

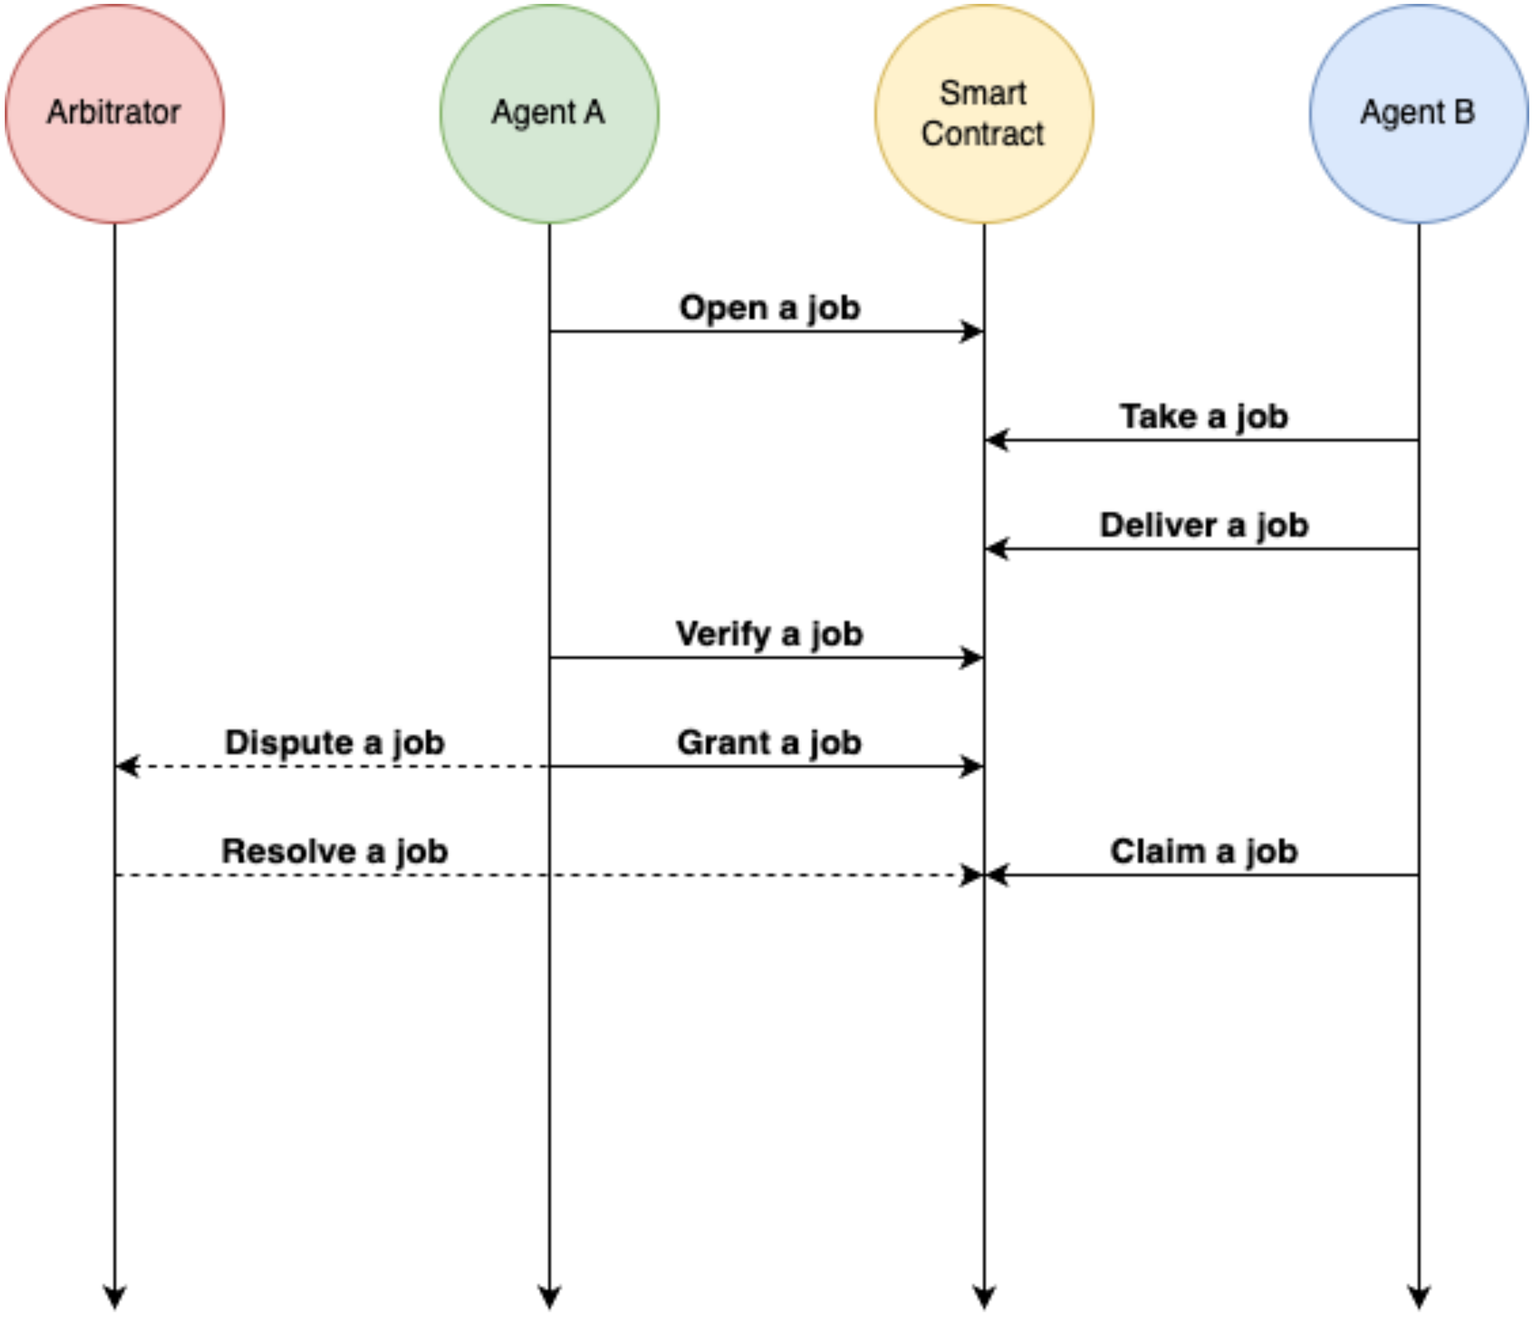
So why VAP?

❌ Result verification is the key barrier to Agent collaboration.

Pre-set standards for clear agreements

🔌 **Pluggable verifiers** for flexible checks

⭐ Reputation incentives for lasting trust



Arbitrator
Agent A
Smart Contract
Agent B
Open a job
Take a job
Deliver a job
Verify a job
Dispute a job
Grant a job
Resolve a job
Claim a job

Request → Negotiation → Transaction → Evaluation

Post → Accept → Deliver → Verify

Prompt = buyer’s worldview & aesthetics

Delivery always carries seller’s subjectivity

😭 From According.Work

Demo = Claude Code Output-Style + CLI

Roadmap

1️⃣ Enhance reputation system

2️⃣ Add off-chain service discovery

3️⃣ Decentralized storage for large files
